EXPERIENCE

Robin Media, Toronto — *Front End Developer*

June 2017 - PRESENT

Part of a small startup team wearing multiple hats as a software and product developer. As well as leading outreach campaigns and company wide analytics integration and reports.

Gjuce GmbH, Cologne — *Front End Developer*

June 2016 - September 2016

Visualizing EV charging stations GeoPositions and building user interfaces for finding the closest recharge opportunity. In an agile environment with 14 other members on the project.

EDUCATION

Adolf Kolping Berufskolleg, Kerpen — *Abitur*

August 2013 - June 2016

Valedictorian and head of student council in a technology focused Gymnasium. Learned fundamental knowledge in database design, microcontroller architecture and programming.

PROJECTS

Finder — *Search and compare concert tickets*

A websocket based solution to finding the cheapest option for concert tickets from multiple vendors. Build using *React* and *Redux* with *Socket.io* and a variety of REST Api's. (<https://finder.tryrobin.co>)

GMC VR — *Explore car features and take a virtual test drive*

A work in progress freelancing project for the car company GMC. Marketing a new set of vehicles. Purely web based and build using *Aframe.js*.

(<https://bit.ly/2IVCrB1>)
